

# **EAP/WX TRANSFER GUIDANCE**

*Program Year 2012 - 2013*

For PY 2012-2013, all DOE funding used for Weatherization work will follow the established DOE rules and regulations. If a dwelling is completed with a combination of DOE Regular and EAP/WX, or ARRA and EAP/WX, all DOE rules and regulations apply.

If a dwelling is completed with EAP/WX Carryover only (these are the funds distributed on July 1, 2012), the following guidance applies:

## **Spending limits**

1. The average spending per household using EAP/WX Carryover funds is \$5000.
2. Health and Safety spending average per household is \$1000. This is an amount that is not included in the \$5000 per household average.

## **Baseload measures**

1. No EAP/WX Transfer Carryover 2012 funding may be used to pay for the installation of refrigerators, CFLs, stoves, or ranges.

## **Multifamily**

1. EAP/WX Carryover funding may only be used in multifamily buildings where tenants either directly or by meter pay their own heating bills.
2. Tenants must meet EAP eligibility requirements.
3. Multifamily conservation work using EAP/WX Carryover 2012 funding will be limited to heating systems.
4. No showerheads or baseload measures may be paid for with EAP/WX Carryover 2012 funding.
5. In a multifamily, where only the minimum of 66% of households meet the EAP eligibility requirement and the landlord agrees to pay for the work in the remaining dwellings, EAP/WX funding may be used.
6. Domestic hot water systems in multifamily buildings may only be addressed with EAP/WX Carryover 2012 funding if they are in combination with the heating system, such as a boiler with a domestic hot water side arm.

## **Heating Plants**

1. The following WAP Policies have been revised effective July 1, 2012. Please review these policies.
  - a. Heating System Replacement
  - b. Clean and Tune
  - c. Standalone

## **Emergencies**

1. In an emergency situation, refer to the Standalone Policy.

For measures and work not covered in this document, follow DOE rules and regulations.
